ExactaDose DILUTION SYSTEM

The SuperAll® ExactaDose Dilution System is an innovative cleaning and dosing system designed specifically to deliver SuperAll® at the exact concentration necessary. Whether you need to fill up a bucket with a 10:1 dilution of SuperAll® and water, feed the inlet of a pressure washer with a 40:1 dilution, fill a day tank with a 100:1 dilution or anything in between, the ExactaDose Dilution System can make that happen. The ExactaDose Dilution System does not require electricity, air or any other power source to operate, only flowing water. This System is not an eductor it's a hydraulically powered pump, so it remains completely accurate even as water flow rates change. Proper dosing means that SuperAll® users will realize the full cost savings potential of SuperAll®'s high level of cleaning efficiency at high dilution ratios.

ExactaDose Dilution System Benefits

- Guarantees Cost Savings by Diluting SuperAll® Exactly as Needed
- Allows SuperAll® to be Run Through Pressure Washers at High Pressure Providing Maximum Cost Savings and Cleaning Efficiency
- Intrinsically Safe/Explosion Proof by Design
- Wide Dilution Adjustment Range (10:1 to 100:1)
- Lockable to Prevent Unauthorized Personnel from Changing Dilution
- Three Way Panel Mounted Valve Allows for Easy Switch from SuperAll® to Fresh Water
- Panel Mounted On/Off Valve with Lock Out for Isolation/Lockout Tag-Out
- Requires no Power Source; only Flowing Water
- Lightweight Design Allows the ExactaDose to be Mounted to Your Equipment or Portable
